

Energy Management System Policy

In the scope of our operations in the Manufacturing, Import, and Export of Textile Products, we are committed to continuously improving our energy performance and Energy Management System (EnMS), ensuring environmental and economic sustainability in full compliance with national and international legislation and regulations.

To achieve this objective, we commit to the following:

- Setting energy-related targets aligned with our energy policy, defining actions to reach these targets with the participation of our employees, regularly reviewing progress, and providing the necessary resources,
- Complying with all applicable energy-related laws and regulations,
- Establishing effective communication with all stakeholders to generate shared value and positive outcomes in energy management,
- Utilizing appropriate resources and technologies to maintain energy consumption under control,
- Improving energy performance indicators, including energy efficiency and intensity across all processes,
- Contributing to awareness-raising on energy sensitivity not only among our employees, but also among suppliers, subcontractors, visitors, and the local community,
- Implementing and monitoring continuous improvements aimed at reducing energy consumption and enhancing energy efficiency,
- Using energy-efficient products, ensuring the procurement of energy-efficient services, and integrating energy efficiency into relevant design activities and procurement processes,
- Continuously improving, documenting, disseminating, reviewing, and updating our Energy Management System across all departments,
- Collaborating with our stakeholders to pursue mutual benefits,
- Our top management is committed to providing all necessary information and resources to achieve the energy-related goals and objectives defined under this policy.
