

# Environmental Policy

- To comply with the environmental legislation in our country and ensure its up-to-date implementation,
- To achieve measurable and continuous improvement in all possible areas related to the environment,
- To identify environmental aspects, determine the types and impacts of environmental effects,
- To minimize pollution and waste, and to ensure the disposal of hazardous waste with minimized environmental impact,
- To provide continuous training to employees and subcontractors and encourage them to implement these principles,
- To set objectives and targets in line with this policy and review and disclose progress annually,
- To continuously improve our Environmental Management System in light of these principles,
- To communicate these principles to the public using available communication channels and remain open to public feedback,
- To ensure that the management consistently monitors the implementation of the committed **ISO 14001** Environmental Policy and objectives,
- All details regarding the Environmental Management System are comprehensively outlined in the ERA.T.29.01 EMS General Information Procedure.

Doc. No: ERA.POL.03.
